A2G07_milestone_2: Iteration 2 Contributions   **Febuary 21, 2026**

Jordan Grewal - 101287828
Nolan Kisser - 101222376
Celina Yang - 101299938
Ozan Kaya - 101322055

Team Member	Contributions
Jordan	- Responsible for the state machine of Scheduler and DroneSubSystem. - Implemented state machine logic and updated UML class diagram to reflect new state fields. - Added display feature to track drone state and number of active fires.
Nolan	- Responsible for creating the system diagrams, including the UML and sequence diagram to display the design and structure of the system - Illustrated the communication between the different subsystems and the system behaviour - Created Readme file outlining project structure and usage
Celina	- Implemented system code for the simulation with CSV event and zone files ● Integrated zone coordinates processing and calculations for drone times (enroute, extinguishing, return) - Developed synchronization and communication between the subsystems
Ozan
